+ ABOUT ME

As a student at SLIATE Institute, I'm learning HTML, CSS,JavaScript, SQL, ReactJS, AngularJS, and NodeJS at the moment.I also have knowledge of Python, Java, C#.NET Framework, and C languages as they relate to software development. I use my expertise in software development, web design, graphic design,and video editing to provide visually striking and powerful designs for a range of requests and personal projects. Even though I see myself as a novice, I would like to work with organizations that respect and complement my abilities. I appreciate you taking the time to read my biography. Please indicate whether you are referring to a job opportunity, project, or offer if you are interested in working with me. You are also welcome to get in touch with me.
